Big Smiles Dental is the nation's largest mobile in-school dental provider; servicing just under 500,000 children annually. Our mission is to increase access to care to those that may not regularly see a dentist, while improving oral health.

All about our program:

- We provide permission forms and letters to the parent for every child.
- Dentists provide an examination or screening, cleaning, fluoride, x-rays, and sealants. Additionally, the dentist can provide services that may include: fillings, simple extractions of baby teeth, and other minimally invasive procedures.
- Most dental insurances, including Medicaid, cover 100% of the services that are provided.
- Our teams are made up of local licensed dentists and staff members.
- Every child receives an "oral health report card" to take home after their visit.
- We leave a copy of the dental exam "report card" with the school for the child's school file.
- Parents of students needing additional treatment and follow-up are contacted by our Patient Care Coordinators.
- We are OSHA & HIPPA compliant.
- We adhere to the CDC Guidelines for Infection Control and to Practical Infection Control for Dental Sealant Programs in a Portable Dental Care Environment as presented at The National Public Health Dental Sealant Conference.
- We have been serving children, families and communities since 1996.

Big Smiles has been happily bringing healthy smiles to children, families and communities for nearly 20 years!!
